One more thing, here's the most current briefing paper on the Oregon CZARA issue.

Yes we have. We have been working with Lynda Hall and Don Waye and they are aware of this meeting and will be participating. It's understanding that the OR CZARA issue will be the focus of this meeting. Recall that we proposed to disapprove OR's CZARA program late last year.

Ellen Gilinsky, Senior Policy Advisor, OW, asks if we have been working with someone in OWOW on this issue--?

Christine -- I am hoping we have a fair bit of pre-existing stuff to provide....

Dan and Tony,

OCIR is setting up this meeting in D.C. next week. They have asked for 1) anything that would be helpful to know about Richard Whitman; 2) information on the coastal nonpoint program (I can check for briefing papers, unless you know that you have a recent one); and 3) appropriate R10 representation on the phone:

“Richard Whitman, Governor Kitzhaber's Director of Natural Resources is out in DC next week to discuss water quality issues and the recent Klamath agreement. I was hoping for him to find some time to sit down with reps at EPA---with a particular focus on the Coastal Toxic Non-point program. Would you all have some availability next Wednesday afternoon post 1 pm? We are free until 5. We would also do an 11:30 or 12 on May 8th?”

I will send more information as I get it.
